CHINT Group Introduction

Sustainable Development Strategy Framework

Based on its vision and mission of sustainable development, CHINT has developed the "EMPOWER" sustainable development strategy model, which begins with the actual needs of the business and its stakeholders. This model aims to empower our business, our customers,

Sustainable Development Organizational Structure

To effectively achieve our sustainable development goals and implement our sustainability strategy, CHINT Group has established a three levels of sustainable

Identification and

CHINT Key Actions

...the identification and selection of key actions for sustainable development, the company has established a systematic framework for identifying and selecting key actions. This framework involves a thorough analysis of the company's business operations, its stakeholders, and the external environment. The goal is to identify the most significant opportunities and risks for sustainable development and to select the most effective actions to address them. Additionally, the company adheres to the sustainable development principles of transparency, accountability, and inclusiveness. It ensures that all stakeholders have a voice in the decision-making process and that the company's actions are transparent and accountable to the public. This systematic approach ensures that the company's key actions are aligned with its business strategy and its commitment to sustainable development.

Key Action 1

As a globally recognized provider of smart energy system solutions, CHINT actively embraces the global vision of carbon neutrality, striving to

Key Action 2

"Clean Technology Opportunities" is one of the core ESG issues in the manufacturing industry. It encompasses, but is not limited to, renewable energy, environmental technology, energy saving and emission reduction technology, and reducing resource consumption. The goal is to explore

The company strictly follows the "Company Law," "Securities Law," "Shanghai Stock Exchange Stock Listing Rules," and other legal and regulatory requirements, has formulated the "Company Articles of Association," and legally established a system of internal control.

Business ethics are crucial for establishing and maintaining trust between the company and customers, investors, partners, and employees.
